DETAILED ACTION

Election/Restrictions

on to one of the following inventions is required under 35 U.S.C. 121:
Claims 1-25, drawn to a semiconductor device, classified in class 257,
subclass 704.

Claim 26, drawn to a method of making a semiconductor device, classified

2 The inventions are distinct, each from the other because of the following reasons:
Inventions II and I are related as process of making and product made. The inventions
are distinct if either or both of the following can be shown: (1) that the process as
claimed can be used to make other and materially different product or (2) that the
product as claimed can be made by another and materially different process (MPEP §
806.05(f)). In the instant case unpatentability of the Group I invention would not
necessarily imply unpatentability of the Group II invention, since the device of the group
I invention could be made by processes different from those of the Group II invention
For example, in claim 26, the electronic component can be formed individually.

3. Because these inventions are distinct for the reasons given above and have
acquired a separate status in the art as shown by their different classification, restriction
for examination purposes as indicated is proper.
